Hi Ayoob,

I was wondering if you could send me whatever requirements information you have for Office Hours so far. The development team will be meeting tomorrow at around 11:00 am after our Software Engineering Class, and it would be helpful to look over this information beforehand. Also, please feel free to join our meeting! Our primary focus will be to establish what Software Development Life Cycle our dev team will be using. Your requirements team's input would be helpful!
